The screenshot displays the MongoDB Data Explorer interface. On the left, the 'Data Explorer' sidebar shows a tree view of clusters and databases. The 'Cluster0' cluster is expanded, showing databases 'admin', 'bankdb', 'bookflow', and 'book_metadata'. The 'book_metadata' database is selected. The main panel shows the 'Documents' tab with a search bar and a query input field. The query is a JSON document:

```
{ "format": { "$regex": "Digital", "$options": "i" } }
```

. The 'Find' button is clicked, and the results are displayed below. The first result is a document with the following fields:

```
{ "_id": ObjectId('6a8d4c91eff570f3b5022a2d'), "book_id": 101, "title": "The Martian", "author": "Andy Weir", "published_year": 2021, "category": "Science Fiction", "format": "Digital PDF" }
```

. The second result is a document with the following fields:

```
{ "_id": ObjectId('6a8d4cc3eff570f3b5022a2f'), "book_id": 102, "title": "Dune", "author": "Frank Herbert", "published_year": 2022, "category": "Science Fiction", "format": "Digital EPUB", "file_size": "3.1 MB" }
```

. The 'Dune' title is highlighted with a dark blue button.
